Supplemental Allowance of Application # 09/814,536

1. The following communication is in response to applicant's RCE received 24-March-2005, and applicant's 1449s received 24-March-2005 and 29-April-2005.

Examiner's Amendment

2. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R.

1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the Issue Fee.

2.1 In the Abstract:

line 8 Change "prece" to --preceding simulation operation as an input condition--.

Reasons for Allowance

3. The following is an Examiner's Statement of Reasons for the indication of allowable subject matter. The instant application is directed to a non-obvious improvement over the information described the prior art, the most relevant of the prior art of record being the article authored by Malkamaki et al., entitled *A Method for Combining Radio Link Simulations and System Simulations for a Slow Frequency Hopped Cellular System*, 1994 IEEE 44th Vehicular Technology Conference, pages 1145-49. The improvement comprises a method and system for

conducting a sequence of linked simulation operations, wherein a sequence generator identifies first and second simulation operations as being sequenced, and automatically generates an input condition for the second simulation operation that at least partially inherits an output condition of the first simulation. This patentable distinction is included in each of the independent claims, nos. 1, 3, 22, 23 and 24. In one embodiment of invention, the second simulation operation specifies a delta condition, wherein the sequence generator generates the input condition for the second simulation utilizing both the delta condition and the output condition of the first simulation (Claims 1, 3, 22 and 23). In a further embodiment, a graphical plot is generated for plotting the first and second sets of values (i.e. conditions) for a parameter (Claim 24). The art of record, either individually or in combination, fails to teach, suggest, or render obvious the useful, concrete and tangible <conducting a sequence of linked simulation operations> having the corresponding structure which is disclosed in the specification and equivalents thereof at least at page 4, line 17 through page 14, line 20, and Figures 1-11. In view of the foregoing, the claims of the present application are found to be patentable over the prior art.

Response Guidelines

4. Any comments considered necessary by applicant **MUST** be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should clearly be labeled "Comments on Statement of Reasons for Allowance".

4.1 Any response to the Examiner in regard to this allowance should be
